United Kingdom Freight and Logistics Market Report 2021-2026: Growth, Trends, COVID-19 Impact, and Forecasts

The "United Kingdom Freight and Logistics Market - Growth, Trends, COVID-19 Impact, and Forecasts (2021 - 2026)" report has been added to ResearchAndMarkets.com's offering. The report notes that the United Kingdom Freight and Logistics market is anticipated to register a moderate growth rate of 2.5% during the period. Rail freight is also anticipated to play a much more prominent role in the movement of goods in the UK.

Predictions and reports such as these are useful indicators of the direction that the logistics industry may take going forward. The anticipated increased percentage of rail is of particular interest, however it is noted that sufficient capacity needs to become available for the optimal growth to occur, demonstrating a need for this to be prioritised.
